

TELL CONGRESS

DON'T PASS MASSIVE TAX CUTS FOR THE WEALTHY ON THE BACKS OF WORKING PEOPLE

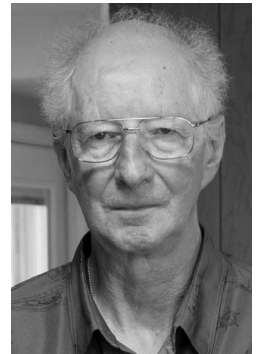

Republicans in Congress have proposed a tax plan that favors corporations and the top 1% over working people. Millions of working families would pay more in taxes while Wall Street would make out like bandits. We cannot afford for this bill to become law.

Tax Breaks for Outsourcing Makes Plan a Job Killer. This plan reduces the tax rate on offshore profits to zero, giving corporations even more incentive to move American jobs offshore. If it passes, working people could see their jobs sent overseas—and they will have to pay more in taxes.

Plan Cuts Medicare and Medicaid and Causes Millions to Lose Insurance. The GOP budget pays for tax cuts in part with drastic cuts to Medicaid and Medicare. And if the plan passes, it would result in millions of Americans no longer having health insurance.

Increases Burden on Students and Those With High Medical Bills. The tax plan eliminates deductions for medical expenses,

meaning millions of Americans with high medical costs would face higher taxes. And it eliminates tax breaks for student loan interest, tuition expenses, and tuition reductions, making it harder for working-class students to further their education.
